

IN THE ABSTRACT:

Please replace the Abstract with the new Abstract attached on a separate sheet.

IN THE CLAIMS:

Please substitute the following claims for the pending claims with the same claim numbers.

13 1. (Amended) A display device comprising a first substrate with a conductor pattern, parts of which define pixels, wherein at least within a viewing area of the display device, the conductor pattern, viewed transversely to the substrate along a direction from the conductor pattern toward the substrate, substantially covers the corresponding part of the first substrate, and wherein the parts of the conductor pattern are substantially mutually separated by partitioning paths having a minimal path width.

14 7. (Amended) A display device as claimed in claim 1, further comprising a second substrate and a layer of electro-optical material between two conductor patterns on the first and second substrates, at least one of which conductor patterns, viewed transversely to the corresponding substrate along a direction from the one conductor pattern toward the corresponding substrate, substantially covers the corresponding substrate.
